

# NEW UPGRADE

**100 million** Negative ions  
Work time **160-180 h**

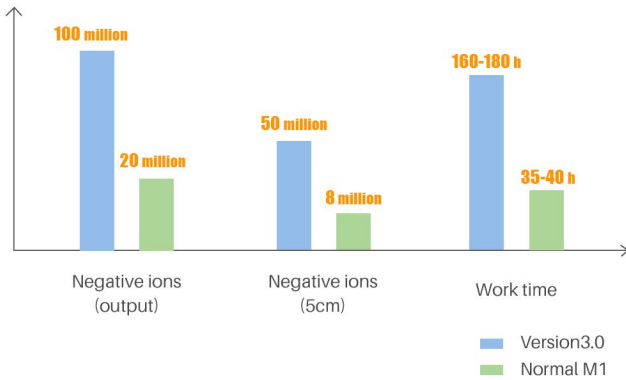

## VERSION 3.0

M1 WEARANLE AIR PURIFIER

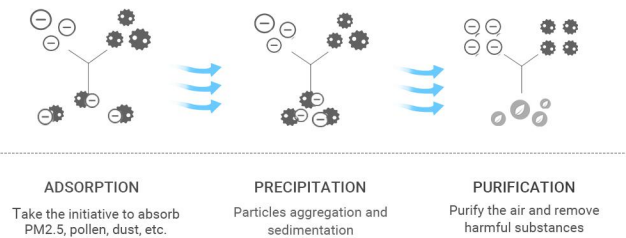

## Version 3.0 VS Normal M1

After half a year of research, AVCIHE has launched a new version M1 version 3.0, negative ions concentration and battery capacity are fully improved

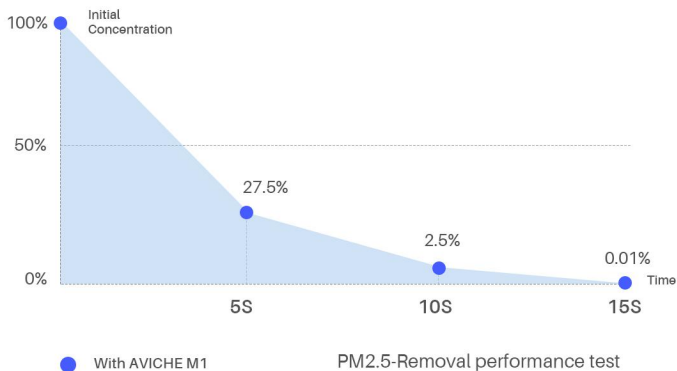

## Higher Negative Ion Release

M1 version 3.0 emits **100 MILLION** negative ions from the brush on top. It can adsorb positively charged suspended particles, neutralize and settle down, and purify the air.

## Faster Purification Speed

The negative ion concentration of M1 version 3.0 is 5 times that of the normal M1, can remove 99.9% of smoke and PM2.5 faster

## Longer Work Time

M1 version 3.0 can work up to **160-180 HOURS** (the normal version of M1 can only be used for 35-40 hours). After the battery capacity is expanded, it can be used continuously for nearly a week when fully charged.

## NEW UPGRADE

M1 Version 3.0 - White

M1 Version 3.0 - Black

## New Package

Compared with the normal version, the M1 version 3.0-white uses a new packaging box.

**How to distinguish version 3.0 and normal version?**

Please pay attention to our anti-fake label!

The inner and outer boxes of the packaging have the only anti-fake label designated by AVICHE.

## Parameter

Model	M1 Version 3.0
Color	Black/White
Negative ions	100 million pcs/cm <sup>3</sup> (output) 50 million pcs/cm <sup>3</sup> (5cm)
Remove PM2.5	99.9%
Sterilize rate	99.9%
Work time	160-180 Hours
Recharge time	6-7 Hours
Weight	50g
Size	80X37X24mm
